**draftLOCK™ WINDOWS ARE MANUFACTURED BY EXPERIENCED CRAFTSMEN
IN STATE-OF-THE-ART FACILITIES ACROSS THE COUNTRY.**

QUALITY CRAFTSMANSHIP YOU CAN DEPEND ON

Smart Glass Home Analysis for Maximum Individual Room Comfort

Rooms May Be Too Warm or Too Cold

Every room in your home is exposed to various degrees of sunlight in the summer and cold winds in the winter. This results in some rooms always feeling too warm while others always feeling too cold. Not the most comfortable of situations.

We Will Analyse Your Home

Our Representative will analyse your home and the unique issues pertaining to every room and will determine what is causing some rooms to be too warm or too cold.

Advise on which Windows & Options will Maximize Individual Room Comfort

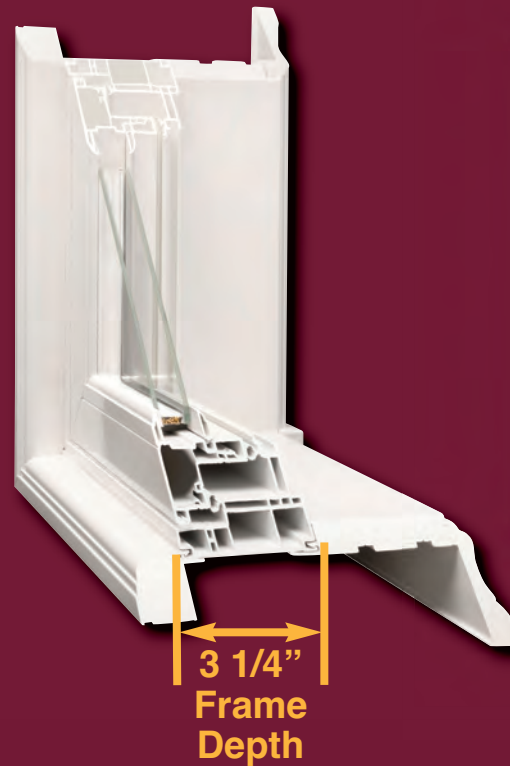

Once our analysis is complete, you will be advised on which windows and options would be best suited to ensure that you experience maximum comfort regardless of which room you happen to be in.

draftLOCK™ STRONGER

SLIM CONTOUR SERIES

draftLOCK™ Standard Window

draftLOCK™ Slim Contoured Series Double Glazed with Optional Foam Insulation

4 5/8" FRAME DEPTH - MORE SOLID & DURABLE

The draftLOCK™ Slim Contour Series window features a 4 5/8" frame depth that further increases the window's stability. This makes the window even stronger and decreases warping and sagging over time especially for larger window sizes.

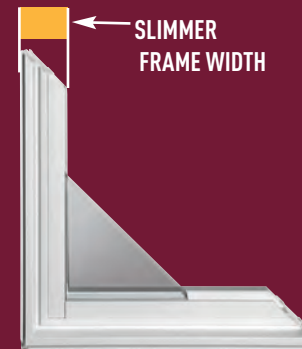

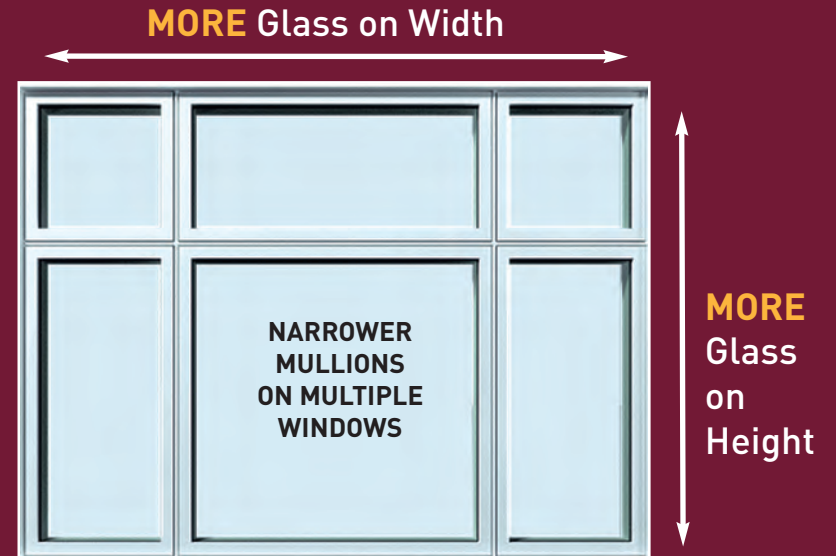

draftLOCK™

SLIM CONTOUR SERIES

BRIGHTER

draftLOCK™ Standard Window

draftLOCK™ Slim Contoured Series

SLIMMER FRAME + NARROWER MULLIONS = MORE GLASS & BRIGHTER WINDOW

With slimmer frames and narrower mullions, the draftLOCK™ Slim Contoured Series window has a larger glazed surface area resulting in more light entering the room and a greater view of the outdoors.

draftLOCK™

SLIM CONTOUR SERIES

GREAT PERFORMER

Slim Contoured Design Solid Structure, Energy Efficient Maximum Durability

Superior Features:

1. Leak Proof Performance

Our windows are made with an advanced ASTM approved acrylic system that eliminates unattractive rubber strips, which deteriorate over time, and securely bonds the sealed glass unit to the sash.

2. World Class Energy Efficient Glass Units

Glass units supplied from world class manufacturers Cardinal I.G and Guardian Glass featuring exceptional LoE Glass Coatings.

3. Optional Foam Insulation

Foam insulation will increase the thermal efficiency of the window.

4. Premium Hardware

Superior hardware increases the durability of our windows.

5. DraftLOCK™ Polymer Spacer System

Designed for consistent window performance durability.

6. 100% Eco-Friendly & Recycleable

Constructed with the highest quality lead-free uPVC, our windows are UV resistant and will not fade, discolour, warp, crack or peel.

7. Maximum Strength Profile Corners

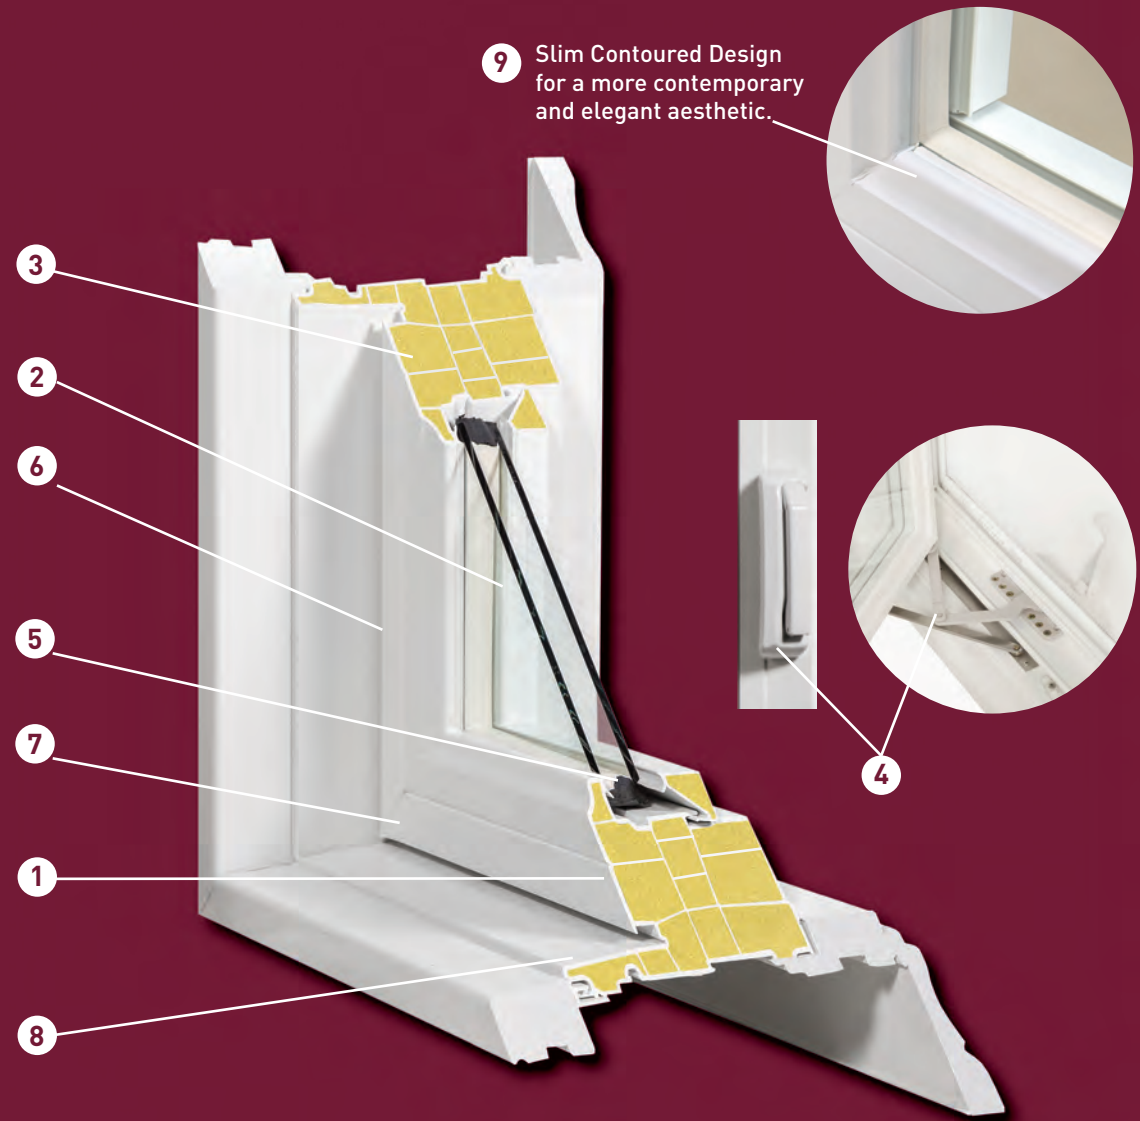

For increased strength, all frame and sash corners are fusion welded throughout.

8. Super Efficient Frames & Sashes

Multiple-chamber frames and sashes ensure greater thermal efficiency and excellent sound proofing.

9. Slim Contoured Design for Contemporary

Contoured design creates a more modern aesthetic.

Double Glazed with Optional Foam Insulation

Canadian Choice Windows & Doors reserves the right to make product improvements in design and construction without notice.

Reinforced Triple Glazed for Performance & Durability

The draftLOCK™ Plus Slim Contour Series triple glazed window units are reinforced and designed with superior weight bearing features to ensure both greater durability and long-term performance.

Energy Star Top Performer with Industry Record R-Value

15% - 25% Greater Energy Rating

The glass unit in the new 4 5/8" frame sits on the warm edge of the wall making it more energy efficient.

draftLOCK™ *plus*

SLIM CONTOUR SERIES

The Slim Contour Series triple glazed has all the same excellent features found on the double glazed window.

Like the Classic Series, the draftLOCK™ Plus Contour Slim Series triple glazed window is designed and constructed to handle the extra weight of a triple glazed glass unit.

Greater structural integrity ensures that the Slim Contour Series triple glazed window will out perform and have greater durability than similar windows on the market today.

Triple Glazed with Optional Foam Insulation

Canadian Choice Windows & Doors reserves the right to make product improvements in design and construction without notice.

One door tilted, the other closed, with screen fully open.

Both doors open with screen full open.

Both doors closed with screen fully open.

Both doors can be opened to 180 degrees for maximum outside view.

Cardinal I. G.

Cardinal I.G. is one of the world's premier LoE glass manufacturer. Its sealed glass units are 45 times less likely to have seal failure over a 20 year period. LoE glass options improve the comfort level of your home by reducing solar heat by up to 65% and UV radiation by up to 95%.

As one of the world's largest glass coaters, Guardian Glass offers numerous low-E solutions that can achieve the proper balance between light and heat. Its low-emissivity (low-E) glass controls the transfer of heat to help make homes more comfortable, energy efficient and filled with natural light.

Cardinal I.G. & Guardian Glass Offer LoE Glass Coatings for Maximum Comfort & Savings

LoE - i89™ Enhanced Performance Glass delivers a center of glass U-factor of just 0.20 when coupled with our LoE³ or LoE² glass and argon fill in a double-pane unit. Rather than absorbing internal heat, LoE - i89 reflects it back into the room, making your living space feel warmer and more comfortable. Cardinal's glass units with LoE - i89 deliver the industry's lowest failure rate – only 0.20% over 20 years.

LoE - 180 High Solar Gain Glass is the perfect cold remedy. Ideal for passive solar applications, it allows winter sun's heat to pass into the home while blocking heat loss to the outside.

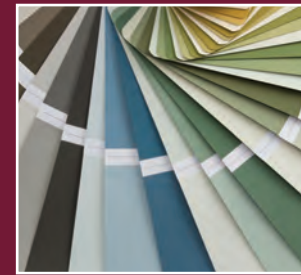

LoE² - 272 Advanced Performance Glass delivers year-round performance and comfort, whether it's -20° F (-29° C) or 110° F (43° C) in the shade. In winter, it reflects heat back into the room. In summer, it rejects the sun's heat and damaging UV rays.

LoE³ - 366 ULTIMATE Performance Glass is the new standard for it delivers the perfect balance of solar control and high visibility – with no room- darkening tints and virtually no exterior reflectance. It provides the highest levels of year-round comfort and energy savings, making it the perfect glass for any location.

draftLOCK™ Polymer Spacer System

The DraftLOCK™ Polymer Spacer System plays an key role in the superior structural integrity of our window. This state-of-the-art 24 hour spacer system uses the most advanced polymers and acrylic adhesives to offset atmospheric changes and pressures. This leads to less seal stress cracks, less outside noise and less issues with humidity and condensation. It also provides exceptional UV resistance. The DraftLOCK™ Polymer Spacer System achieves consistent seal integrity with outstanding durability.

1000's of Colours & Textured Finishes

Transform your home from ordinary to extraordinary with our new Coloured & non-glare Textured Finishes. Available in an array of colours as well as custom matched colours for that personalized look.
