Looks as Good Inside as it does Outside

Complement your Windows
with Wood and Vinyl Interior Trim Systems

Interior trim packages are available in pine, oak and other fine woods
as well as in our maintenance free Vinyl Interior Trim System.

Dual-Seal Synthetic Warm Edge Construction

Cardinal I.G.

LoE Glass Coatings for Maximum Comfort & Savings

Cardinal's new LoE - i89™ Enhanced Performance Glass delivers a center of glass U-factor of just 0.20 when coupled with our LoE³ or LoE² glass and argon fill in a double-pane unit. Rather than absorbing internal heat, LoE - i89 reflects it back into the room, making your living space feel warmer and more comfortable. Cardinal's glass units with LoE - i89 deliver the industry's lowest failure rate – only 0.20% over 20 years.

Cardinal's LoE - 180 High Solar Gain Glass is the perfect cold remedy. Ideal for passive solar applications, it allows winter sun's heat to pass into the home while blocking heat loss to the outside.

Cardinal's LoE² - 272 Advanced Performance Glass delivers year-round performance and comfort, whether it's -20° F (-29° C) or 110° F (43° C) in the shade. In winter, it reflects heat back into the room. In summer, it rejects the sun's heat and damaging UV rays.

Cardinal's LoE³ - 366 ULTIMATE Performance Glass is the new standard for it delivers the perfect balance of solar control and high visibility – with no room- darkening tints and virtually no exterior reflectance. It provides the highest levels of year-round comfort and energy savings, making it the perfect glass for any location.

Low Maintenance Glass Option Makes Life Easier

Cardinal's Neat® naturally clean glass on the outside works by harnessing the power of the sun's UV rays to loosen dirt so water can simply rinse it away, leaving windows virtually spotless. Your windows stay cleaner longer and clean easier.

The World's Best Sealed Glass Unit

The Lowest Failure Rate for Sealed Glass Units in the World

Manufactured exclusively by Cardinal I.G., the world's premier LoE glass manufacturer, these sealed glass units are 45 times less likely to have seal failure over a 20 year period than any other manufacturer.

The Most Reliable Dual Seal System on the Planet

Our Air-tight glass units are sealed with PIB (polyisobutylene) - the only impermeable Elastomer in the world.

Superior Comfort & Performance with Multiple LoE Glass Options

LoE Glass Options allow you to maximize the comfort level of your home by reducing solar heat by up to 65% and UV radiation by up to 95%.

Completely Guaranteed with Laser-etched identification and Permanent Registration

Quality control and superior customer service is further ensured as each sealed unit is registered and on file with both Cardinal I.G. and Canadian Choice.

State-of-the-Art Structural Design

1. Leak Proof Performance

Our Revolutionary New Acrylic Glazing Technology uses an advanced ASTM approved acrylic system that eliminates unattractive rubber strips, which deteriorate over time, and securely bonds the sealed glass unit to the sash.

2. Most Energy Efficient Glass Unit

Our glass units are dual sealed with PIB and high modulus silicone and feature a desiccant filled continuous warm edge spacer with a patented infrared white polyester interface for the greatest thermal efficiency.

3. Best Sealed Glass Unit

To further ensure against glass seal failure our windows are manufactured with Continuous Corner Sealed Units.

4. Top-of-the-line Heavy Duty Hardware

Our windows are constructed with only 100% Truth® Maxim Heavy Duty quality hardware components backed by an industry leading Lifetime Transferable Warranty.

5. 100% Eco-Friendly & Recycleable

Our windows are constructed with the highest quality, un-plasticized, lead-free UuPVC, expertly compounded and extruded directly from pure powder. These windows are UV resistant and will not fade, discolor, warp, crack or peel.

6. Maximum Strength Profile Corners

To ensure increased overall strength, all frame and sash corners are fusion welded throughout the full profile. Our windows have no exposed vulnerable rubber seals.

7. Super Efficient Frames & Sashes

Multiple-chamber frames and sashes ensure greater thermal efficiency in both the winter and summer months. They also provide excellent sound proofing. Certified for Zones: 1, 2 and 3.

8. Enhanced Foam Filled Chambers

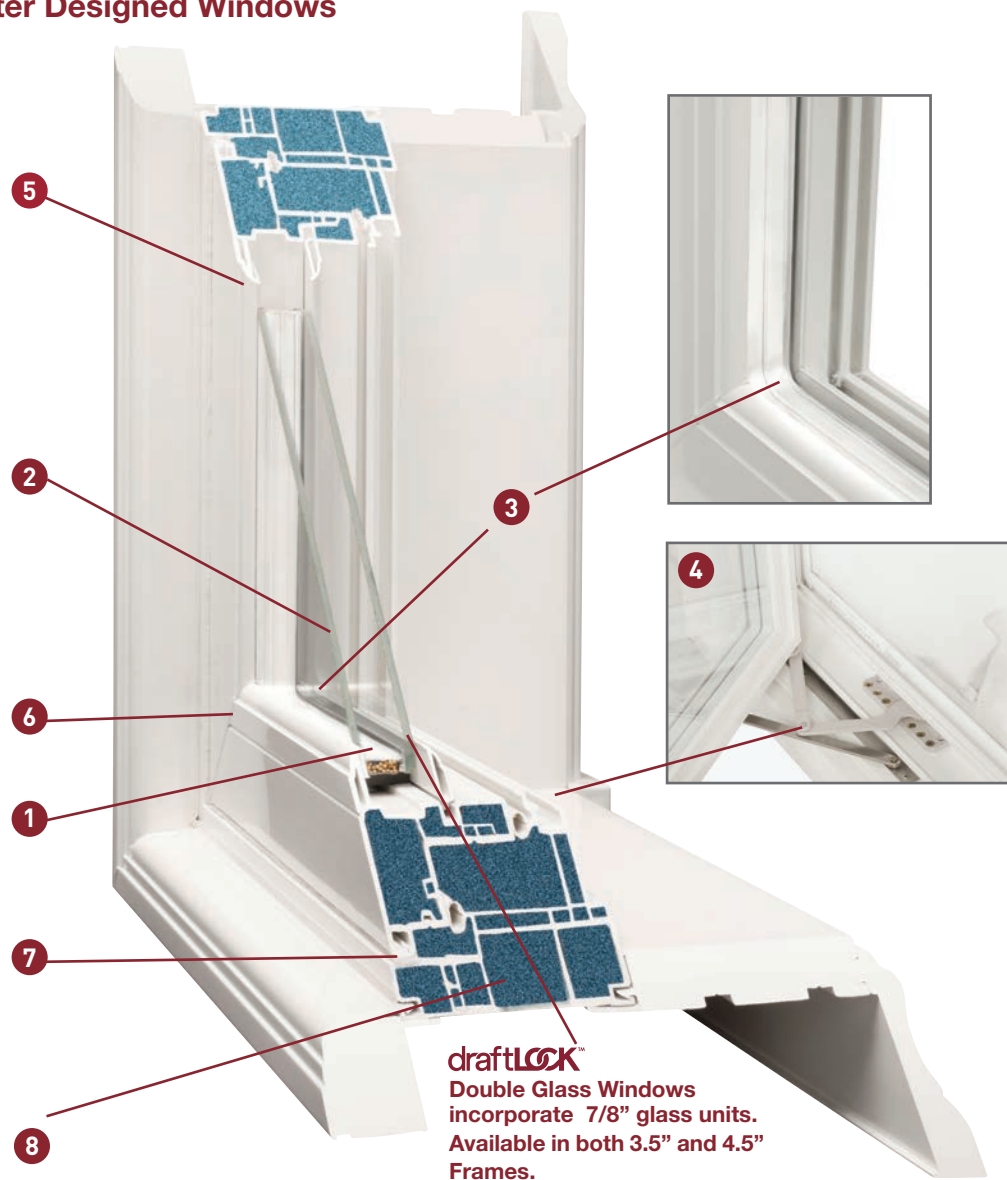

Our multiple-chamber frames and sashes are foam filled for extra thermal efficiency in hot or cold climates.

draft**LOCK**™

Better Sealed Glass Units

Better Constructed Frames & Sashes

Better Designed Windows

draft**LOCK**™
Double Glass Windows
incorporate 7/8" glass units.
Available in both 3.5" and 4.5"
Frames.

Certified for Zones: 1, 2 and 3.

Canadian Choice Windows & Doors reserves the right to make product improvements in design and construction without notice.

draft**LOOK**[™]*plus* Triple Glazed Casement Windows Built to handle extreme weather conditions.

The draft**LOOK**[™]*plus* Triple Glazed Window Frame is designed and constructed to handle the extra weight of a triple glazed glass unit.

This means it will perform better and last longer than similar windows on the market today.

draft**LOOK**[™]*plus* Triple Glazed Windows incorporate 1 3/8" glass units. Available in both 3.5" and 4.5" Frames.

draft**LOOK**[™]*plus* certified high performance Energy Star windows, with their uniquely sealed LoE glass units, will let you enjoy the sunlight for they are specifically designed to deal with intense solar heat gain and destructive UV exposure regardless of the season.

Canadian Choice Windows & Doors reserves the right to make product improvements in design and construction without notice.

Award Winning New Triple Glazed Casement Window

Built for Virtually Any Climate

Energy Star top Performer with Industry Record R-Value

The Cardinal I.G. manufactured sealed glass unit achieved
an industry record R-9.4 R-Value.
Certified for Zones: 1, 2 and 3.

Reinforced Frames for Superior Performance & Greater Durability

Unlike most competitors who use dual glazed window frames to hold triple glazed units, our draft**LOOK**[™]*plus* Triple Glazed Casement Window uses a frame that is specifically engineered with fiberglass reinforcement inserts and thicker weight-bearing profile walls to handle the extra weight load of triple glazed sealed glass units.

This ensures greater durability and long-term performance for the ultimate in window performance.

Smart Glass Home Analysis for Maximum Individual Room Comfort

1. Rooms May Be Too Warm or Too Cold

Every room in your home is exposed to various degrees of sunlight in the summer and cold winds in the winter. This results in some rooms always feeling too warm while others always feeling too cold. Not the most comfortable of situations.

2. We Will Analyse Your Home

Our Representative will analyse your home and the unique issues pertaining to every room and will determine what is causing some rooms to be too warm or too cold.

3. Advise on which Windows & Options will Maximize Individual Room Comfort

Once our analysis is complete, our Representative will advise on which windows and options would be best suited to ensure that you experience maximum comfort regardless of which room you happen to be in.

**Regardless of what
the weather is like
outside, we will
make sure that you
are comfortable in
every room of
your home**

How do we do it:

draftLOOK™ Double Glazed

draftLOOK^{plus} Triple Glazed

**These windows are engineered for the highest
performance and durability in all climate conditions.**

Canadian Choice Windows & Doors Lifetime Comprehensive Warranty

Canadian Choice windows are laser identified and computer registered at the Cardinal I.G. plant, so that you will always know who to call in case a problem should arise; in which case you will be covered by Canadian Choice Windows & Doors' Industry Leading Warranty Program.

Canadian Choice Windows & Doors' Lifetime Comprehensive Warranty guarantees all its windows against seal failure. In the rare case of seal failure, Canadian Choice will provide a replacement sealed unit free of charge and will issue a cheque in the amount of \$50.00 for any inconvenience to the homeowner.
